

CASE STUDIES

MELEXIS TECHNOLOGIES SA – SEMICONDUCTOR BUSINESS

MELEXIS is a global supplier of micro-electronic semiconductor solutions, GWS Partners worked with them in 2019 at their office in Bevaix, Switzerland and hour from Geneva. Melexis fantastically combine hardware and software engineering under one roof and face many challenges in a fast-moving environment. GWS Partners delivered training and coaching to aid teams and management in understanding new ways of working. Here is a review from Alessandro Basili of Melexis:

“You could feel his energy and passion and he has left us with much more than just some knowledge, but a will to change and find our ways into building a truly self-organised team. I'd recommend Robert to any organization who's looking to change gear and embrace the Agile transformation.”

ABBOTT DIABETES CARE - HEALTHCARE

In the heavily regulated Healthcare/Pharma environment, Abbott is pushing and growing. Through a combination of training and coaching, GWS Partners worked with Abbott to enable a focus on team growth and delivery as well as stakeholder engagement;

“The thanks are ours, your knowledge and passion for Agile shone through and I feel it rubbed off onto the team.”

AS TRUSTED ADVISERS WE DO
NOT INSTRUCT OUR CLIENTS
WHAT TO DO, RATHER WE WORK
WITH THEM TO ALIGN THEIR
CHALLENGES AND CONTEXT.
THEN COLLABORATE TO DELIVER
SUCCESSFUL CHANGE THAT THEY
THEN OWN GOING FORWARDS.

GWS PARTNERS

IMSERV EUROPE LTD – ENERGY INDUSTRY

One of GWS Partners greatest successes, the IMServ contract focused on creating 1-2 development teams, but grew into an organisational transformation with teams from sales, operations, legal & compliance, reporting and all the way up to the exec level undergoing a shift.

This was even more of an achievement because it was achieved with a 30-day engagement spread over 3 months. As is our aim as your trusted partner; *minimal cost, maximum impact.*

In the end GWS Partners delivered in excess of 400% expected organisational change within that 30-day delivery window.
